

### CRed Word search

Read the passage below and find the words in CAPITAL LETTERS on the word search.

Did you know that each of us in the UK produces about 9 tonnes of CARBON DIOXIDE (CO<sub>2</sub>) each year through ENERGY CONSUMPTION at home, school and transport. That's enough to fill 5 HOT AIR BALLOONS. When we leave LIGHTS and ELECTRICAL EQUIPMENT on we waste energy and create unnecessary (CO<sub>2</sub>) this is causing CLIMATE CHANGE and GLOBAL WARMING. There are serious consequences for us all.

Global warming means changes in weather and the environment. RISING SEA LEVELS are affecting many low lying areas. Weather is becoming more unpredictable with more extremes of STORMS and DROUGHTS threatening food supplies. We can do our best to stop this.

Help SIR KILAWATT in his fight against climate change. SAVE WATER by not leaving taps running. TURN OFF lights and appliances when you are not using them and REDUCE the amount of carbon dioxide we produce.
